-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after allowance or after an Office action under *Ex Parte Quayle*, 25 USPQ 74, 453 O.G. 213 (Comm'r Pat. 1935). Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on 11/19/04 has been entered.

2. Claims 31 and 32 are pending in this application and have been examined.

Drawings

3. Clean copies of the drawing sheets of the printed Patent have been submitted as per the requirements of 37 CFR 1.173(a)(2). No further drawings submission is required.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which

Art Unit: 2137

said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 31 and 32 are rejected under 35 U.S.C. 103(a) as being unpatentable over John et al., US 4,341,952, and Fite et al, US 5,513,169.

As for claims 31 and 32, John teaches an optical disk and method for its manufacture (Abstract: laser disk), comprising, a data zone for recording information readable by light radiation (col. 2 lines 37-55: the regions denoted by elements 9 and 11 of fig. 2 encode information related to the data stored on the disk), a track of spiral shape (col. 3 lines 15-20), a barcode pattern formed on the track (col. 2 lines 53-55: the arrangement and width of the pattern formed by the tracks forms the barcode, therefore the barcode is formed "on" the tracks). John does not teach the barcode being formed by a laser. However Fite does teach this feature (col. 5 lines 9-25). Therefore it would have been obvious to one of ordinary skill in the art at the time of the invention to incorporate this feature into the system of John. It would have been desirable to do so as this would allow for more precise positioning of the tracks forming the barcode pattern on the disk.
